FACILITY-WIDE REQUIREMENTS

1. No air contaminant shall be released into the atmosphere which causes a public nuisance. [District Rule 4102]
2. The owner or operator shall notify the District of any breakdown condition as soon as reasonably possible, but no later than one hour after its detection, unless the owner or operator demonstrates to the District's satisfaction that the longer reporting period was necessary. [District Rule 1100, 6.1; County Rule 111 (Kings)]
3. The District shall be notified in writing within ten days following the correction of any breakdown condition. The breakdown notification shall include a description of the equipment malfunction or failure, the date and cause of the initial failure, the estimated emissions in excess of those allowed, and the methods utilized to restore normal operations. [District Rule 1100, 7.0; County Rule 111 (Kings)]
4. The owner or operator of any stationary source operation that emits more than 25 tons per year of nitrogen oxides or reactive organic compounds, shall provide the District annually with a written statement in such form and at such time as the District prescribes, showing actual emissions of nitrogen oxides and reactive organic compounds from that source. [District Rule 1160, 5.0] Federally Enforceable Through Title V Permit
5. Any person building, altering or replacing any operation, article, machine, equipment, or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate, reduce, or control the issuance of air contaminants, shall first obtain an Authority to Construct (ATC) from the District unless exempted by District Rule 2020 (12/20/07). [District Rule 2010, 3.0 and 4.0; and 2020] Federally Enforceable Through Title V Permit
6. The permittee must comply with all conditions of the permit including permit revisions originated by the District. All terms and conditions of a permit that are required pursuant to the Clean Air Act (CAA), including provisions to limit potential to emit, are enforceable by the EPA and Citizens under the CAA. Any permit noncompliance constitutes a violation of the CAA and the District Rules and Regulations, and is grounds for enforcement action, for permit termination, revocation, reopening and reissuance, or modification; or for denial of a permit renewal application. [District Rules 2070, 7.0; 2080; and 2520, 9.8.1 and 9.13.1] Federally Enforceable Through Title V Permit
7. A Permit to Operate or an Authority to Construct shall not be transferred unless a new application is filed with and approved by the District. [District Rule 2031] Federally Enforceable Through Title V Permit

10. The operator shall retain records of all required monitoring data and support information for a period of at least 5 years from the date of the monitoring sample, measurement, or report. Support information includes copies of all reports required by the permit and, for continuous monitoring instrumentation, all calibration and maintenance records and all original strip-chart recordings. COMPLIANCE ASSISTANCE BULLETIN

(Updated September 2015)

TITLE V REPORTING REQUIREMENTS

Title V Permit holders are required to submit three types of reports. The first is the **Deviation Report**. All Title V facilities are required to promptly report any deviations from permit requirements to the District. Reports are to be submitted within 10 days of discovery and must include a description of the permit requirement deviation, the probable cause, and any corrective action or preventive measures taken. Send this report to the local Compliance Division office.

The second is the **Report of Required Monitoring** required every six months. This report must clearly define all instances of deviations from permit monitoring requirements. *This report is to be submitted to the District every 6 months. The initial permit issuance date is designated as the beginning of the reporting period, unless other arrangements are made with the District.*

The third is the **Compliance Certification**. This document certifies compliance with the terms and standards contained in Title V permits including emission limits, standards, and work practices. The certification shall include the identification of each federally enforceable permit condition and its compliance status. The certification shall also report whether compliance was continuous or intermittent, the methods used for determining the compliance status, and any other facts required by the District to determine the compliance status of the source. *The Compliance Certification is to be submitted annually to the District, and a copy is to be submitted to EPA. The initial permit issuance date is designated as the beginning of the reporting period, unless other arrangements are made with the District.*

District Rule 2520 requires that any report or document submitted, pursuant to a Title V permit, shall contain a **Certification of Truth and Accuracy Form**.
